**UNDERSIDE VIEW**

1. Place **DW** under one Gable end panel with Primer side up and connect the Gable end to Part **DW** keeping 1-1/4" in from edge and up 1-1/2" from bottom. Connect with two 1" screws through Panels into **DW**. Butt second Gable End up to first Gable End and attach in the same manner.
2. Position connected Gable Ends flush to top of Ridge Board **CU**. Connect with four 1-1/2" nails through Panels into Ridge Board.
3. Position all trim parts prime side down as shown on flat surface, keeping **CVL** and **CVR** Gable trim flush at peak and to Horizontal Gable trim **CUL** and **CUR**. Center assembled Gable panels on top of trim as shown and secure with 1" screws through Gable panels into Trim as shown. Trim will overhang bottom as shown.

4. Position Large Roof Panel flush at Peak and Front Trim. Secure with four 1-1/2" nails into Trim **CVL** and with two 1-1/2" nails into the Ridge Board **CU**.

5. Position second Large Roof Panel flush to first Panel and Trim. Secure with four 1-1/2" nails into Trim **CVR** and with two 1-1/2" nails into Ridge Board **CU**.

6. Position Gable Assembly on building Roof (usually centered over Door opening). **Note: Starter row of shingles should be applied first.** Secure Gable Assembly to Roof with (8) 1-1/2" nails (four per side) through Reverse Gable Roof Panels into building Roof.

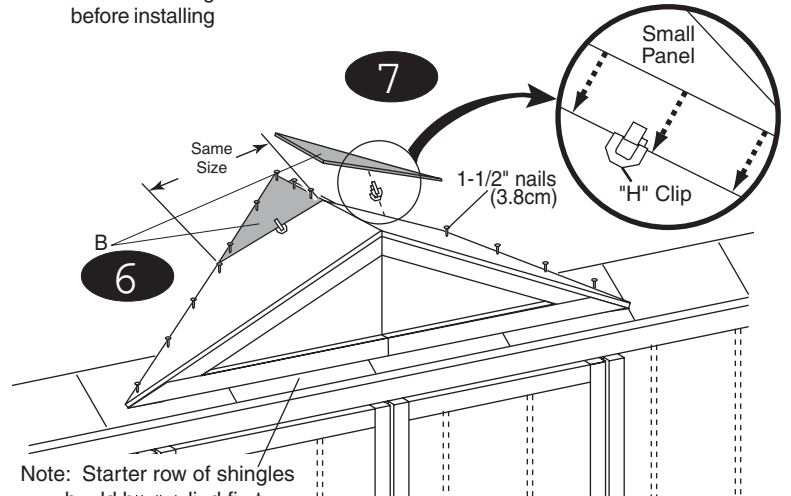

7. Place one H-Clip centered on the unattached edge of the Left Large Roof Panel. Position the same size side of Small Roof Panel as rear of large panel into H-Clip. Align Small Roof Panel flush with Large Roof Panel at Ridge Board. Secure with (5) 1-1/2" nails, three into Roof Panels and two into Ridge Board, as shown.

Continue with opposite side in same fashion.

Caulk (not included in Kit) between Gable Roof and building Roof and between Gable End Panels and building Roof as shown.

Finish Gable Ends and Trim using two coats of Exterior Grade Acrylic Latex Paint.

Note: Follow shingle manufacture recommendations for valley installation of shingles.

9

8-9. If building is not shingled, shingle roof first. Follow all manufacturers instructions for shingling. Overlap reverse gable by 6" or more as shown in figure 8. If a shingle does not run up gable by 6" cut tab off and run a full shingle up gable. Once roof is completed then shingle reverse gable as shown in figure 9. Run reverse gable shingles all the way to the valley where the roofs meet. Cut the shingles on the reverse gable back by 2".
