(Pan systems only)

Name: _____

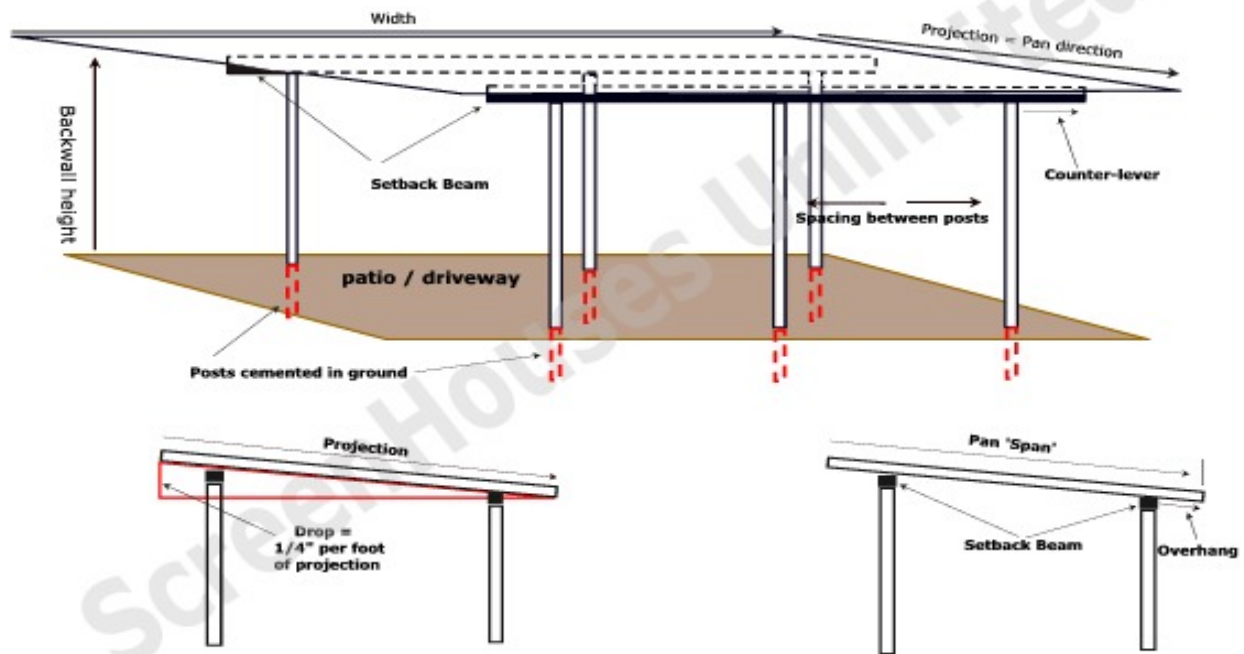

Phone Number: _____

Email Address: _____

Home Attached System

Free Standing System

Not Included in our Kits:

- Downspouts are not included. Let us know if you require them. They are \$35.00 for a basic 8' assembly. They are easily picked up locally and this would give you the freedom to create the shape you need.
- Flashing is not included. When doing a fascia board mount, you will need to flash 3" under the shingles and about 12" out onto your patio cover. On a wall mount, "L" flashing would go under the siding and again about 12" out onto your cover.
- Hardware to attach the back-wall fascia gutter to house wall or fascia board is not included.
