5 Year Limited Warranty

These do it yourself sunrooms have a Roof Structure that is made of 1 1/2" square extruded aluminum with a baked on enamel finish. Once up, there is no need to take it down! This sunroom kit has a Super Vent in each roof panel located at the peak of the roof, allowing for the escape of wind and humidity.

The Carrousel screened patio enclosures have a cover that will last up to 15 years in normal conditions. Designed to stay up all year round, this 22 oz vinyl is made to last. It is also flame retardant (NFPA 701), UV resistant to prevent yellowing, tear and abrasive resistant and we have incorporated an "anti-wicking" agent to prevent mold and mildew. Need more? Okay, finally there is a special cold crack resistant additive to the vinyl so that the top can withstand temperatures as low as -50°F. Of course it is guaranteed for 5 years against discoloration.

These sunroom kits also have a 6" Overhang built into every unit, preventing the rain from washing down the screen face. Also as part of the overhang is our aesthetically pleasing Double Valence, where the second valence is white and is part of our special roof attach system. Our valences can be the wave format or straight - your choice. Used as spa enclosure kits, these screened patio enclosures are made with 1/8" thick Extruded Aluminum!

Made to last! Our Carrousel screened patio enclosures come with Sliding Polymer Windows. Fully framed, the polymer is made especially for us with a Japanese calendaring process. It is made with a super double clear polish in either clear or smoke and has a 20 ml thickness - virtually unbreakable! Of course, in keeping with the quality of the rest of this spa gazebo kit, the polymer windows are UV resistant, crack resistant up to -30°F, fire retardant and has the anti-wicking agent to prevent mold and mildew. The windows slide sideways and are designed to be left in place, just like the whole unit, for the winter.

The combination of roof overhang, roof tensioning system and roof pitch means that water accumulation on the roof is virtually eliminated. This is a very high quality, long lasting gazebo style room that is easily assembled within a day.

Highest Quality

- The support bar? What support bar!? This screen room kit gives you a clear line of sight because our panels are made with the highest quality extruded aluminum and engineered for maximum strength.
- The extruded aluminum frames (extrusion dies are exclusive to these screen room kits) are wide enough to incorporate fully framed sliding polymer windows.
- Left side hinged heavy duty in-swinging door is standard. The door has an easy entry handle.
- The heart of the quality of this screened patio enclosure is its roof tightening system which allows you to maintain a tight roof all the way around the unit. It is ingeniously easy and stretches the roof over its supports without exposing the roof to rough edges or corners. A patented "over and under" roof tightening system allows you to keep your cover looking good year after year. We call it our FLASH system because it is quick and easy!
- Of course our Flash system is part of a 6" overhang built in all the way around the screen enclosure preventing water runoff from flowing down the screen face.
- All panels are snap fit construction finished off with finishing hex screws to add support, rigidity and strength. No cables - no plastic pieces.
- Roof support assembly is made of 1 1/2" square extruded aluminum poles all coming together in the peak in a specially designed extruded aluminum hub.
- The combination of roof overhang, roof tensioning system and roof pitch means that water accumulation on the roof is virtually eliminated.
- This is a very high quality, long lasting gazebo style room that is easily assembled within a day.
- Vinyl top color choices: green, blue, eggshell, burgundy & beige
- Five year warranty on all major materials.

Obtaining necessary permits is the sole responsibility of purchaser. Customers agree to hold ScreenHouses Unlimited and manufacturer free of any liability for improper installation, maintenance and repair.

We accept VISA, MasterCard and PayPal payments OR get a 5% discount by sending a Cashier's Check. Please note special or custom orders not returnable.

5 Year Limited Warranty

Our Patented FLASH System

(light not included).

Note: 143" includes an extra 1" all around to account for installation flexibility

Panel width = 56.5"
Door width = 35"
Door Swings in...
Wall Height = 78"
Interior Height = 119"

- the exact footprint of the panels are 141" x 141"
- angle of octagonal is 22.5 degrees
- a standard 56.5 inch panel with door is composed of 2 small side panels and 1 door - 35 inches wide
- there is a 6 inch overhang all around the structure making the overall roof dimensions 148" x 148"
- overall height of structure is 119"
