

12' Round Dark Blue Top

Premium Quality

- The support bar on the inside of the screen panels is at center height on the door and 1/3 from the bottom on all other panels.
- This means that you have a clear line of sight when seated but the screen door is protected at the door handle.
- Right side hinged heavy duty out-swinging door is standard.
- Roof tensioning system is built into the end of the roof rafters and is accessed from within the overhang using a large thumb nut for ease of operation.
- The combination of roof overhang, roof tensioning system and roof pitch means that water accumulation on the roof is virtually eliminated.
